Denver, Colorado 80265

Subject: Reclamation surety required for Vent Hole Amendment, Denison Mines, Pandora Mine, M0370012, Task 1821, San Juan County, Utah

Dear Mr. Roberts:

The Division has no conceptual issues with your proposal to add two new vent holes for the Pandora Mine received September 6, 2007. However, no instructions were provided as to how this amendment will be incorporated into the Notice on file at the Division. Specific instructions are given by submitting MR-REV-att found on our web site, on how this amendment is to be incorporated into the current Notice. Please submit this form, a clean copy of the amendment and a revised map showing the location of these vent holes and the other vent holes associated with the Pandora Mine. The Division suggests revising the General Location Map submitted in 2005. All references to the word "proposed" should be removed from this clean copy.

Prior to approval you will need to increase the reclamation surety by \$10,210.00 to \$142,910.00. You will also need to gain approval from the Forest Service.

The Division is hesitant to accept letters or attachments to modify the current Notice since the plan is outdated; lacking very basic environmental resource, operation, and reclamation information. The Division strongly encourages Dennison Mines to reformat and update the mining and reclamation plan for this site.

Please call Jed Pearson, Division bonding coordinator, at 801-538-5382 for information about submitting the revised surety. If you need other information, please call me at 801-538-5258 or Paul Baker at 801-538-5261.

Sincerely,

Susan M. White
Mining Program Coordinator
